Some say you can't create a stronger economy while also protecting the environment.

State Senate candidate **BOB STEINBURG** has a lifetime of experience proving them wrong.

Before devoting his retirement years to public service, Bob Steinburg spent his entire adult life in the private sector. Hailed as a "Champion of Clean Energy," he's putting his experience to work, seeking innovations to decrease our nation's dependence on foreign oil, attract new investment in renewable energy to our state, and help create the high-paying jobs of the future.
